(1) Cash flow used in operations and cash flow used in operations per share are not recognized measures under Canadian generally accepted accounting principles. Refer to the Management's Discussion and Analysis for further discussion.

(2) For a description of the boe conversion ratio, refer to the commentary at the beginning of the Management's Discussion and Analysis.

President's Message

The first three months of 2010 was a period of analysis and continued achievement for Reliable Energy Ltd. After an extremely busy fourth quarter of 2009 that included primarily exploration drilling and seismic data acquisition at Kirkella, our Company's core area located in southeastern Saskatchewan/southwestern Manitoba, we spent the early part of the 2010 first quarter evaluating the results of these activities. Many exciting opportunities were identified, and as a result, were used in planning our operations for the balance of the quarter.

Operational Accomplishments

During the three months ended March 31, 2010, our Company continued to reach new milestones and produced exceptional year-over-year results that included:

- Drilling 9 gross (7.0 net) wells. Of the nine wells, 7 gross (5.5 net) were development wells and 2 gross (1.5 net) were exploration wells. Five wells drilled targeting the Bakken were subsequently placed on production. In addition, 4 gross (3.0 net) wells were drilled into two South Kirkella pools and a new Manson pool targeting the Bakken or Lodgepole formations. All four wells were suspended and are awaiting completion operations following spring breakup.
- Improving average daily production to 307 boe/d, up 527% from a year ago and up 50% from the fourth quarter of 2009. We exited the period at 367 boe/d.
- Increasing total undeveloped land holdings 80% to 77,200 net acres from 42,858 net acres a year ago. At Kirkella, the Company was successful in Crown land sales during the 2010 three-month period, and as a result, added an additional 8,000 net acres to its land inventory.
- Completing a 2-D seismic program covering 124 kilometres. As a result of the data interpretation, ten exploration prospects have been identified for drilling during the remainder of 2010.
- Achieving an operating netback of \$52.55/boe, representing a 127% increase from \$22.13/boe in the first quarter last year and a 6% increase from \$49.35/boe in the final three months of 2009 due to higher crude oil prices and lower royalty costs. Following the construction of a new central battery and water disposal system on our Kirkella South No. 1 pool, which is anticipated to be completed in July 2010, we expect to further improve operating netbacks and efficiencies as well as reduce operating costs going forward.

Outlook

Our Company's strategy for the current year is focused on a balance of true exploration drilling (to discover new reserves) and development drilling (to increase production and cash flow), an approach aimed at maximizing shareholder value. In addition, we remain committed to increasing our presence at Kirkella by continuing to acquire lands on prospects that have been identified, through geology and geophysics, as having potential for light sweet oil in the Bakken, Lodgepole and Three Forks formations. To enhance success in our drilling program, we believe that seismic data is essential for identifying new prospects and delineating discovered pools, and as a result, we have allocated approximately \$1.2 million of our annual budget towards shooting and acquiring additional 2-D and 3-D seismic data. The Kirkella project area is currently comprised of 66,000 net acres of undeveloped land at 74% working interest with an exploration drilling inventory exceeding 16 wells.

On May 27, 2010, Reliable closed a bought deal financing with a syndicate of underwriters for gross proceeds of approximately \$15.0 million, which was heavily oversubscribed. The financing, combined with available credit facilities and this year's annual projected cash flow of \$8.1 million to \$9.1 million, will enable the Company to expand its capital expenditure program for 2010, including potential horizontal drilling tests and a pilot water flood, aimed at further enhancing production and reserves in our core area.

I look forward to updating you on our second quarter activities in our next interim report.

On behalf of the Board of Directors,

A handwritten signature in black ink, appearing to read "M. Swanson", written in a cursive style.

Murray Swanson

President & Chief Executive Officer

May 27, 2010

Management's Discussion and Analysis

The following Management's Discussion and Analysis ("MD&A") as provided by the management of Reliable Energy Ltd. ("Reliable" or the "Company") reports on the financial condition and the results of operations of Reliable for the three months ended March 31, 2010 and 2009 and should be read with the accompanying unaudited interim financial statements and related notes and the audited consolidated financial statements and related notes for the year ended December 31, 2009. This commentary is based on the information available as at, and is dated May 27, 2010.

Basis of Presentation

The financial data presented has been prepared in accordance with Canadian generally accepted accounting principles ("GAAP"). The reporting and measurement currency in this MD&A and in the financial statements is the Canadian dollar, unless otherwise stated.

Non-GAAP Measures

This MD&A contains the term "cash flow from" or "funds used in" operations. Cash flow from or funds used in operations and cash flow from and funds used in operations per share amounts are not measures that have any standardized meaning prescribed by Canadian GAAP and are considered non-GAAP measures, and as a result, should not be considered an alternative to or more meaningful than cash flow from/used for operating activities or net earnings as determined in accordance with Canadian GAAP as an indicator of the Company's performance. Therefore, these measures may not be comparable to similar measures presented by other issuers. These measures have been described and presented in this discussion and analysis in order to provide shareholders and potential investors with additional information regarding the Company's liquidity and its ability to generate funds to finance its operations. Management utilizes cash flow as a key measure to assess the ability of the Company to finance operating activities and capital expenditures. The terms "cash flow from operations" and "funds used in operations" as presented in the financial statements are used synonymously and are calculated by adding non-cash items (future taxes, stock-based compensation expense, and depletion, depreciation and accretion) to earnings or losses for the period. The Company also presents cash flow from or used in operations per share whereby per share amounts are calculated using weighted average shares outstanding consistent with the calculation of earnings per share. The following table reconciles funds used in operations to cash flow from operating activities, which is the most directly comparable measure calculated in accordance with GAAP:

Three Months Ended March 31,	2010	2009
	(\$)	(\$)
Cash flow from operating activities	(1,137,417)	(495,897)
Changes in non-cash working capital	(2,068,715)	(93,338)
Funds generated by (used in) operations	931,298	(402,559)

BOE Conversion

Certain natural gas volumes have been converted to barrels of oil equivalent ("boe") using six thousand cubic feet ("mcf") of gas equal to one barrel ("bbl") of oil unless otherwise stated. This conversion ratio is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead.

Forward-Looking Information

Certain information in this MD&A constitutes forward-looking statements or information (collectively referred to herein as "forward-looking statements") within the meaning of applicable securities legislation. Forward-looking statements are usually identified by the words "believe", "anticipate", "expect", "plan", "estimate", "target", "continue", "could", "intend", "may", "potential", "predict", "should", "will", "objective", "project", "forecast", "goal", "guidance", "outlook", "effort", "seeks", "schedule", or expressions of a similar nature suggesting future outcome or statements regarding an outlook. In particular, forward-looking statements include:

- Reliable believes that with its working capital, unutilized credit facilities, expected cash flow from operations and access to capital markets that it will have sufficient capital resources to fund its capital expenditure program for 2010; and
- All of the statements under the heading "Outlook".

These forward-looking statements are subject to certain assumptions, including the assumption that the exploratory drilling program undertaken in the fourth quarter of 2009 will result in new discoveries that will require significant development drilling and equipping expenditures in 2010.

Forward-looking statements are not guarantees of future performance and the reader should not place undue reliance on these forward-looking statements as there can be no assurances that the assumptions, plans, initiatives or expectations upon which they are based will occur. In addition, forward-looking statements are subject to known and unknown risks, uncertainties and other factors that could cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by forward-looking statements. Such factors include, among others: general economic and business conditions; the price of and demand for oil and natural gas and their effect on the economics of oil and gas exploration; fluctuations in currency and interest rates and their

effect on projected profitability of the Company's operations; the ability of the Company to implement its business strategy, including exploration and development plans; the impact of competition; the availability and cost of seismic, drilling and other equipment; the Company's ability to secure adequate transportation and markets for any oil or gas discovered; drilling and operating hazards and other difficulties inherent in the exploration for and production and sale of oil and natural gas; the availability and cost of financing; the success of any exploration and development undertaken; actions by governmental authorities; and, changes in government regulations and the expenditures required to comply with them (including, but not limited to, the changes in taxes or the royalty or other share of production taken by governmental authorities). Should one or more of these risks or uncertainties materialize, or should any of the Company's assumptions prove incorrect, actual results may vary in material respects from those projected in the forward-looking statements. Readers are cautioned that the foregoing list of risks, uncertainties and other factors is not exhaustive. Unpredictable or unknown factors not discussed could also have material adverse effects on forward-looking statements. The impact of any one factor on a particular forward-looking statement is not determinable with certainty as such factors are dependent on other factors, and the Company's course of action would depend on its assessment of the future considering all information then available. All forward-looking statements in this MD&A are expressly qualified in their entirety by these cautionary statements. Except as required by law, the Company assumes no obligation to update forward-looking statements should circumstances or management's estimates or opinions change.

Material Assumptions on Forward-Looking Information

The Company's presentation of forward-looking information is based on internally generated budgets relating to drilling plans and related costs, expected results from drilling as well as estimated royalties, operating costs and administrative expenses. Reliable bases the commodity pricing for budget purposes on a range of publicly available pricing forecasts and also considers general economic conditions. The combination of these elements gives rise to expected financial results, inclusive of debt and working capital for the budget period.

Production and Sales Rates

During the first half of 2010, Reliable expects that production and sales of light crude oil and natural gas will average between 300 and 400 boe/d. There are many factors that could result in production levels being less than anticipated, including: greater than anticipated declines in existing production due to poor reservoir performance, mechanical failures or inability to access production facilities; the unanticipated encroachment of water or other fluids into the producing formation; and, the inability to drill, complete and tie-in wells on schedule due to a lack of oilfield services being available on a cost efficient basis, poor weather, the inability to negotiate surface access with the landowners, or regulatory delays in obtaining all necessary drilling and production approvals.

Production Mix

The Company anticipates that its 2010 product volume mix will be similar to 2009, and as a result, will approximate 97% light crude oil and 3% natural gas. This expectation may not be met if the wells are not drilled when expected (see "Drilling Program" below) or if the wells do not produce as expected (see "Production and Sales Rates" above).

Commodity Prices

For purposes of its forecast for 2010, the Company has assumed that the price it will receive for the sale of its crude oil will average CDN\$76.50/bbl and that the natural gas price at AECO for spot delivery will average \$5.00/mcf. There are many risks that may result in commodity prices being less than expected. The price of crude oil is set in U.S. dollars on the world market and is influenced by global supply and demand factors as well as exogenous events, such as terrorist activity in oil exporting countries. The current slowdown in economic growth due to recession in several of the world's major economies could further reduce both the demand and price for crude oil. The price of natural gas in North America is primarily related to the domestic supply and demand equation. Demand is primarily affected by heating requirements in winter and cooling requirements in summer, with warm winters and/or cool summers having a negative demand influence. Supplies are generally domestic and respond to prices, but an increase in the deliverability of global natural gas liquids into the North American market can also, at times, influence the supply situation.

Canadian producers realize a Canadian dollar price for crude oil and natural gas, all of which are determined in large part by the U.S. dollar price for such products adjusted for the U.S. to Canadian dollar exchange rate. The exchange rate is influenced by many factors, which have and will continue to result in high volatility. Reliable has used a Canadian to U.S. dollar price exchange rate of \$0.95 for its forecast pricing.

Royalty Rates

Reliable expects that royalty rates during the first six months of 2010 will average in the range of 16% to 20% of gross revenue. Total royalties are the combination of Crown royalties paid on Crown lands and freehold royalties paid on freehold lands. Crown royalties and freehold production or mineral taxes on Crown lands are also eligible for a royalty holiday that arises through drilling incentives granted by some of the provinces in which Reliable has operations. In addition, gross overriding royalties are payable on lands in which the Company has earned an interest by way of farm-in, whether the lands are Crown or freehold. Total royalties payable are a function of the mix between Crown and freehold lands as the rates are different.

During 2009, the Company's royalty mix was 47% Crown royalties, 18% freehold royalties and 35% overriding royalties, and the combined royalty rate was 17%. The actual combined royalty rate in any period will be a function of the mix between Crown, freehold and overriding production. Crown royalty rates are determined by the depth of the well, production rates and the price of crude oil or natural gas. As Crown, freehold and overriding royalties are calculated as a percentage of revenue, royalties will vary directly with revenue and tend to mitigate the risk of declining revenues from lower production levels and/or lower commodity prices.

Operating Costs

The Company expects operating costs to average in the range of \$7.50 to \$10.00/boe for the first six months of 2010.

General and Administrative ("G&A") Costs

Reliable anticipates that G&A expenses will remain constant for the first half of 2010. Risks that G&A costs will increase relate to higher than expected employee costs necessarily incurred by the Company to retain key employees in a competitive market, the need to hire more staff than originally anticipated and general cost inflation.

Cash Flow Used In Operations

The Company expects that cash flow used in operations will be approximately \$2.0 million for the first six months of 2010. This estimate is based on the assumptions as to production, commodity prices, royalty rates, operating costs and G&A costs discussed above. The risk that cash flow used in operations is less than expected is the aggregate of all risks affecting the individual components thereof.

Capital Expenditures

Reliable expects to incur between \$7.0 million and \$8.0 million for capital expenditures to June 30, 2010, excluding potential future acquisition activity. Reliable's capital expenditures will consist of costs for drilling, completions, equipment, tie-ins, land and seismic. This is based on the assumption that the Company drills 12 gross wells during the six-month period. The capital program during 2010 is flexible, depending on commodity prices. Increases in capital costs from budgeted amounts can occur for the following reasons: general cost inflation in the industry resulting from high utilization rates; poor weather that can delay activity and subject the Company to stand-by charges; and, problems encountered in drilling a well that can result in additional drilling time or, in some cases, losing the well entirely.

Drilling Program

The Company expects to drill at least 12 gross wells during the first six months of 2010. The drilling program is a key assumption in the production estimates for the period discussed above. The risk that Reliable will not meet its drilling targets is attributable to the following: delays in accessing drilling sites due to extended road bans and/or unseasonable weather conditions; lack of access to drilling rigs and related equipment at sites; delays in obtaining landowner consent for surface access; and, delays in obtaining well licences and drilling permits.

Drilling Success

During 2010, the Company expects to add reserves from its drilling activities. In arriving at such expectations, Reliable undertakes a risking process where each well is assigned a probability of success and the expected reserves that would be added in a success case. The basis for such assessment is a combination of geological, geophysical and reservoir engineering analysis, including reviewing analog reserves in the area of interest. There are many risks that a well may not add the reserves anticipated, including: poor reservoir rock due to low permeability and/or low porosity that inhibits production; the non-existence of the targeted zone due to erosion; the lack of an effective reservoir seal, preventing the migration of hydrocarbons; presence of water in the zone; damage to the zone from the drilling process; and, competitive drainage from offsetting acreage not owned by the Company.

Developing Future Prospects

Reliable intends to continue generating and developing its own prospects and acquiring lands directly as well as through farm-ins as part of its business strategy. To do so requires that appealing opportunities become available within the timeframe suitable to the Company, that Reliable has the necessary human and financial resources to pursue and capture such opportunities, and that the Company is able to prevail over its competitors pursuing the same projects. Risks in achieving such growth plans relate to a lack of adequate staffing or capital, or to an overly competitive market where other industry participants are prepared to pay more for a prospect than what Reliable would consider prudent.

Tax Horizon

Reliable will not become cash taxable during the first six months of 2010 based on the foregoing assumptions. Liability for current income tax is a function of the amount of revenue and expenses recognized for tax purposes, including deductions for capital expenditures. As such, taxable income is affected by many factors, including: production levels; commodity prices; and, the level and classification for tax purposes of capital spending into one of several categories, with each being deductible at different rates. The liability for current income tax could be higher than expected if revenues exceed Reliable's budget, if capital spending is lower than expected, or if a greater proportion of capital spending is allocated to a lower deduction category.

Current Market Conditions

Management is aware that the current equity market conditions may not always be conducive to raising funds through treasury issues of common shares. However, with the successful closing of its recently announced financing, combined with cash flow from operations and unutilized credit facilities, the Company will have the financial capability to continue its 2010 capital program.

General

Statements relating to "reserves" are also deemed to be forward-looking statements as they involve the implied assessment, based on certain estimates and assumptions, that the reserves described can be profitably produced in the future.

The actual results could differ materially from those anticipated in these forward-looking statements as a result of the risk factors and assumptions set forth above and elsewhere in this MD&A.

These factors should not be considered as exhaustive. The reader is cautioned that these factors and risks are difficult to predict and that the assumptions used in the preparation of such information, although considered reasonably accurate at the time of preparation, may prove to be incorrect. Accordingly, readers are cautioned that the actual results achieved will vary from the information provided herein and the variations may be material. Consequently, there are no representations by the Company that actual results achieved will be the same in whole or in part as those set out in the forward-looking information. Furthermore, the forward-looking statements contained in this MD&A are made as of the date hereof, and the Company undertakes no obligation, except as required by applicable securities legislation, to update publicly or to revise any of the included forward-looking statements, whether as a result of new information, future events or otherwise. The forward-looking statements contained herein are expressly qualified by this cautionary statement.

Financial and Operating Results of Oil and Gas Activities

Production, Revenue and Price

Three Months Ended March 31,	2010	2009
Production		
Light crude oil (<i>bbls/d</i>)	289	27
Natural gas (<i>mcf/d</i>)	107	135
Total production (<i>boe/d</i>)	307	49
Total production (<i>boe</i>)	27,621	4,410
	(\$)	(\$)
Revenue		
Light crude oil	2,092,718	153,782
Natural gas	40,724	47,780
Gross revenue	2,133,442	201,562
Royalties	348,969	32,350
Operating expenses	333,051	71,604
Net operating revenue	1,451,422	97,608
Average Prices		
Light crude oil (<i>\$/bbl</i>)	80.42	64.48
Natural gas (<i>\$/mcf</i>)	4.24	3.93
Total sales price (<i>\$/boe</i>)	77.24	45.71
Royalty costs (<i>\$/boe</i>)	12.63	7.34
Operating costs (<i>\$/boe</i>)	12.06	16.24
Netback (<i>\$/boe</i>)	52.55	22.13

For the first quarter of 2010, revenue totaled \$2,133,442 on average daily sales volumes of 307 boe/d compared to \$201,562 and 49 boe/d a year ago and \$1,387,578 and 204 boe/d recorded in the fourth quarter of 2009. The 958% year-over-year revenue gain resulted from a 527% increase in sales volumes with the Company benefiting from strong crude oil pricing. For the three months ended March 31, 2010, the Company's realized sales price for light crude oil was \$80.42/bbl, while the natural gas sales price averaged \$4.24/mcf compared to \$64.48/bbl and \$3.93/mcf, respectively, in the same period last year. During the first three months of 2010, Reliable's product volume mix was 94% light crude oil and 6% natural gas.

At Kirkella, Manitoba, production averaged 289 bbls/d (net) during the 2010 first quarter versus 27 bbls/d (net) a year ago.

During the three months ended March 31, 2010, production volumes from the Harmattan, Alberta area decreased 21% to 107 mcf/d (net) from 135 mcf/d (net) in the same period last year and up 133% from the fourth quarter of 2009 as a result of putting two wells back on production in the first quarter. Subsequent to quarter-end, all four wells were shut-in.

Royalties

Three Months Ended March 31,	2010	2009
	(\$)	(\$)
Crown royalties	184,434	–
Freehold royalties	135,105	10,297
Overriding royalties	29,430	22,053
Total royalties	348,969	32,350
Total royalties (<i>\$/boe</i>)	12.63	7.34
Percent of revenue (%)	16.4	16.0

For the first quarter of 2010, the Company recorded total royalties of \$348,969 or 16.4% of revenue versus \$32,350 or 16.0% of revenue for the same period in 2009. The increase in royalty rate was due to the increase in oil production and a year-over-year improvement in commodity pricing. Reliable's Crown royalties have increased relative to the mix of total royalties, which is reflective of the increase of production from Crown leases, primarily in the Kirkella area.

At Kirkella, current production is subject to the Manitoba Crown royalty, federal Crown royalty, freehold royalty and a sliding scale overriding royalty. The Manitoba government grants a royalty holiday for new wells drilled. The amount of the holiday is determined based on the depth drilled, the proximity of the well to other wells cased for production from the same or lower formations and the price of crude at the Enbridge Cromer Terminal. The federal Crown royalties are calculated on the same basis as the provincial Crown, but have no royalty holiday and are subject to a minimum 12.5% of production. Overriding royalties are calculated on a 5% to 15% sliding scale basis for oil. Freehold royalties are calculated at approximately 15% of production. At Kirkella, royalties for the first quarter totaled \$340,509, consisting of provincial Crown: \$47,234; federal Crown: \$137,200; freehold: \$126,645; and, overriding royalties: \$29,430.

Production from the Harmattan region is subject to freehold royalties ranging from 15% to 35%. The royalty incurred during the three months ended March 31, 2010 totaled \$8,460 or 20.8% of revenue. During the first quarter of 2010, there was no freehold mineral tax incurred as all Harmattan wells were producing below the minimum mineral tax threshold.

Operating Expenses

Three Months Ended March 31,	2010	2009
	(\$)	(\$)
Kirkella	278,490	14,625
Harmattan	44,113	50,710
Other	10,448	6,269
Total operating expenses	333,051	71,604
Total operating expenses (\$/boe)	12.06	16.24

During the three months ended March 31, 2010, the Company's operating expenses totaled \$333,051 or \$12.06/boe compared to \$71,604 or \$16.24/boe in the same period last year.

Operating expenses at Kirkella consist primarily of transportation costs for oil as well as transportation and disposal of produced water, which combined to total 59% of total operating costs. For the 2010 three-month period, operating costs at Kirkella were \$278,490 or \$10.70/boe and included transportation and water disposal costs of \$6.31/boe with the balance including surface rentals, operating supplies and field supervision costs.

For the first quarter of 2010, operating costs at Harmattan were \$44,113 or \$27.59/boe. Expenses in the Harmattan area were lower in the 2010 period primarily due to decreased direct supervision costs and higher maintenance costs incurred during the 2009 period.

Other operating expenses incurred during the first quarter of 2010 related primarily to lease rental costs in the Trochu Basin area.

Operating Netback

Three Months Ended March 31,	2010	2009
	(\$/boe)	(\$/boe)
Gross revenue	77.24	45.71
Royalty expenses	12.63	7.34
Operating expenses	12.06	16.24
Operating netback	52.55	22.13

For the first quarter ended March 31, 2010, Reliable recorded an operating netback of \$52.55/boe versus \$22.13/boe a year ago.

At Kirkella, the Company's operating netback increased due to Bakken oil production, which contributed \$56.63/boe for the quarter.

Year-over-year operating netbacks recorded at the Company's Harmattan property decreased in the 2010 three-month period to \$(7.41)/boe due to decreased production volumes.

General and Administrative (“G&A”) Expenses

Three Months Ended March 31,	2010	2009
	(\$)	(\$)
Salaries and management consulting	315,733	248,495
Legal	19,835	8,555
Computer services and subscriptions	45,400	40,108
Accounting and audit fees	31,075	23,637
Investor relations	41,031	35,408
Other professional services	24,775	2,973
Travel and business entertainment	15,868	9,623
General office expenses	105,473	80,595
	599,190	449,394
Recoveries	(108,593)	(21,603)
Total G&A expenses	490,597	427,791

For the quarter ended March 31, 2010, total G&A expenses increased to \$490,597 from \$427,791 recorded during the same period of 2009. The 15% increase was primarily due to higher salaries and management consulting expenses, which were up \$67,238 or 27% from last year due to increased staffing levels, salary increases and higher benefit costs as a result of transferring management personnel from consultants to employees. Year-over-year increases in certain G&A expenses included:

- Legal expenses increased \$11,280 resulting from fees associated with both the establishment of a credit facility with a Canadian chartered bank and preparation of employment contracts for senior management;
- Other professional services rose \$21,802 primarily due to an increased provision for reserves evaluation;
- Accounting and audit fees increased \$7,438 resulting from higher audit and review fees as well as income tax preparation; and
- General office expenses increased \$24,878 due to higher office rent and the loss of two office space sub-rentals, increased insurance costs and a generally higher level of activity in 2010.

Interest and Financing Expenses

Three Months Ended March 31,	2010	2009
	(\$)	(\$)
Interest on convertible debentures	32,391	31,498
Interest and line of credit fees	2,493	–
Taxes on unexpended flow-through share obligations	4,931	66,668
Total interest and financing expenses	39,815	98,166
Total interest and financing expenses (\$/boe)	1.44	22.26

Taxes on unexpended flow-through share obligations decreased to \$4,931 in the quarter compared to \$66,668 in 2009 due to lower total obligations and lower interest rates. These costs represent a form of interest or tax on the balance of funds that were raised through the issue of flow-through shares, which have been renounced to shareholders under the look-back rule but have not yet been spent on qualifying expenditures.

Depletion, Depreciation and Accretion (“DD&A”)

Three Months Ended March 31,	2010	2009
	(\$)	(\$)
Depletion and depreciation	802,932	82,752
Accretion expense	8,917	4,360
Loss (gain) on settlement of retirement obligations	667	(1,234)
Total DD&A	812,516	85,878
Total DD&A (\$/boe)	29.42	19.47

The provision for depletion is based on independent estimates of proved reserves. Depletion expense was significantly higher in 2010 due to the addition of new wells that were brought on-stream partially offset by lower natural gas production volumes. Depreciation of non-resource assets is calculated on a straight-line basis at various rates between 20% and 45%. During the first quarter of 2010, the Company's asset retirement obligation increased to \$867,247, which represents the fair value of the future abandonment costs for oil and gas property acquired, wells drilled and facilities constructed. The increase consisted of:

- Accretion expense of \$8,917;
- Additional obligations incurred on wells drilled during the quarter of \$129,000; and
- Adjustments to previously estimated costs of \$2,000.

Impairment Expense

Management has determined that there was no impairment of Reliable's petroleum and natural gas assets as at March 31, 2010 and 2009. The impairment test was based on independent evaluations and management's estimates of the Company's proved plus probable oil and gas reserves.

Income Taxes

As at March 31, 2010, the Company had various tax pools estimated at \$18,300,000 available to reduce future taxable income and corporate income taxes.

The Company recorded a future income tax recovery of \$397,523 (2009 – \$2,560,750). The recovery was due to the reversal of the valuation allowance recorded in previous years partially offset by current year income tax expense.

In December 2009, Reliable issued 9,350,000 flow-through common shares at \$0.43 per share for total proceeds of \$4,020,500. Under the terms of the flow-through agreement, the Company is committed to spend \$4,020,500 on qualified exploration expenditures by December 31, 2010. These expenditures were renounced to the flow-through share investors effective December 31, 2009. At March 31, 2010, \$1,782,122 remained to be incurred on eligible expenditures.

Cash Flow and Net Income

Three Months Ended March 31,	2010	2009
	(\$)	(\$)
Net income	508,206	2,071,903
Non-cash charges:		
DD&A	812,516	85,878
Interest and financing charges	8,766	7,873
Future income taxes	(397,523)	(2,560,750)
Retirement obligations settled	(677)	(7,463)
Funds generated by (used in) operations	931,298	(402,559)

During the first quarter of 2010, funds generated by operations totaled \$931,298 or \$0.005 per basic share versus \$(402,559) or \$(0.003) per basic share used in operations in the comparable period of 2009. The improvement was due to an increase in net operating revenues resulting from new oil production at Kirkella.

The Company recorded net income of \$508,206 or \$0.003 per basic share during the first three months of 2010 compared to \$2,071,903 or \$0.016 per basic share in the same period a year ago.

Capital Expenditures

Three Months Ended March 31,	2010	2009
	(\$)	(\$)
Land acquisitions	700,971	1,351,453
Geological and geophysical	1,087,073	209,831
Drilling and completions	2,877,713	817,051
Equipping and tie-ins	360,299	174,284
Corporate assets	8,178	14,295
Allowance for future restoration expenditures	131,000	21,000
Total capital expenditures	5,165,234	2,587,914

For the three months ended March 31, 2010, land acquisition expenditures totaled \$700,971 (2009 – \$1,351,453) as the Company added approximately 8,250 net acres of undeveloped lands primarily at Kirkella compared to approximately 21,450 acres added at Kirkella in the same period of 2009. Geological and geophysical expenditures were \$1,087,073 (2009 – \$209,831) resulting from the shooting of 124 kilometres of 2-D seismic data. During the period, drilling and completions expenditures totaled \$2,877,713 (2009 – \$817,051) that involved the drilling of 9 gross (7.0 net) wells. Of the 9 wells, 5 gross (4.0 net) wells were successful and have been placed on production. The remaining 4 gross (3.0 net) wells will be completed as soon as the road bans are removed in Manitoba, which is expected by the end of May. In the comparative quarter of 2009, the Company drilled 1 gross (1.0 net) well, which was suspended.

Drilling Activity

	Exploration		Development		Total	
	Gross	Net	Gross	Net	Gross	Net
	(#)	(#)	(#)	(#)	(#)	(#)
Three Months Ended March 31, 2010						
Light crude oil	2	1.5	7	5.5	9	7.0
Natural gas	–	–	–	–	–	–
Total wells	2	1.5	7	5.5	9	7.0
Average working interest (%)		74		80		78
Three Months Ended March 31, 2009						
Light crude oil	1	1.0	–	–	1	1.0
Natural gas	–	–	–	–	–	–
Total wells	1	1.0	–	–	1	1.0
Average working interest (%)		100		–		100

Liquidity and Capital Resources

Liquidity

The Company's liquid assets are comprised of cash, short-term deposits and accounts receivable from the sale of petroleum products, and joint venture billings from industry partners. Reliable confirms that the cash and short-term deposits are maintained on demand with the Company's banker and represent minimal liquidity risk to the Company. In view of the current economic climate, Reliable has made an assessment of accounts receivable and reports that 62% of amounts outstanding at March 31, 2010 have been received and the balance is expected within existing payment terms. The majority of the remaining accounts receivable relate to GST and joint venture billings with industry partners. The Company believes that minimal exposure exists with these particular accounts and sufficient security exists to recover amounts due to the Company in the event of default.

Management of the Company's liquidity involves the careful use of its liquid assets along with anticipated cash flows and access to debt and equity markets to fund growth in future exploration and development drilling activities.

Capital Resources

The Company exited the first quarter of 2010 with a working capital deficit of \$1,923,213 compared to working capital of \$1,994,017 at December 31, 2009. The reduction in working capital was the result of capital expenditures and was partly offset by an improvement in funds from operations (see "Cash Flow and Net Income" and "Capital Expenditures" for more details).

Reliable has a credit facility agreement with a Canadian chartered bank to provide the Company with a \$5,000,000 revolving operating loan, a \$2,000,000 acquisition/development loan and certain related facilities having an aggregate limit of \$150,000. All facilities are payable on demand. The operating line bears interest at the bank's prime rate plus 1.5% p.a. and the acquisition/development loan bears interest at the bank's prime rate plus 2.0% p.a. All facilities are secured by, among other things, a debenture over all the Company's assets. The credit facility will provide the Company the flexibility to effectively develop its Bakken oil play at Kirkella.

Reliable believes that with its working capital, unutilized credit facilities, expected cash flow from operations and access to capital markets that it will have sufficient capital resources to fund its capital expenditure program for 2010.

Sources and Uses of Cash

Three Months Ended March 31,	2010	2009
	(\$)	(\$)
Cash – beginning of period	7,822,336	8,396,051
Cash flow from (used in) operations	931,298	(402,559)
Change in non-cash working capital		
Operating	(2,068,715)	(93,338)
Financing	–	–
Investing	430,838	342,142
Issue of common shares, net of issue costs	185,706	(33,955)
Capital expenditures	(5,034,234)	(2,566,914)
Cash – end of period	2,327,229	5,641,427

During the quarter, cash and cash equivalents decreased to \$2,327,229 from \$5,641,427 at December 31, 2009. The decrease is summarized below.

Cash generated by operations totaling \$931,298 was the result of:

- General administrative expenses of \$490,597;
- Net interest expense of \$28,860; and
- Improved net operating revenue of \$1,450,755.

Funds used in changes in non-cash working capital totaled \$1,637,877 and were due to:

- Funds relating to operations decreasing \$2,068,715 primarily as a result of a decrease in accounts payable relating to general operating activities; and
- Funds relating to investing activities increasing \$430,838 due to increased payables relating to capital expenditures on land purchases and drilling activities.

Share Capital

As at May 27, 2010, Reliable had 204,601,930 common shares, 30,000,000 special warrants exercisable into 30,000,000 common shares of Reliable, 10,736,350 stock options and 505,716 common share purchase warrants issued and outstanding. A total of 10,150,000 stock options are outstanding to management, directors, employees and key consultants under the Company's stock option plan with exercise prices between \$0.14 and \$0.20 per share and with a weighted average remaining contract life of 44 months. The balance of 586,350 stock options is outstanding to various brokerage firms with an exercise price of \$0.12 per share and with a weighted average remaining contract life of one month. In 2008, the Company issued 505,716 common share purchase warrants exercisable at \$nil per share to members of management in recognition of deferred bonus plan obligations entered into in 2005 and 2006. These warrants are exercisable until December 24, 2013.

On May 27, 2010, Reliable closed a bought deal financing with a syndicate of underwriters and issued 30,000,000 special warrants at a price of \$0.30 per special warrant and 16,500,000 common shares issued on a flow-through basis at a price of \$0.365 per flow-through share for aggregate gross proceeds of approximately \$15,000,000.

Off-Balance Sheet Arrangements

Reliable has various contractual obligations and commitments arising in the normal course of operations and financing activities. These obligations and commitments have been considered when assessing the cash requirements in the above discussion of future liquidity.

As at March 31, 2010, the Company was committed to future payments under an operating lease for office space through April 2011 totaling \$222,600 (2010 – \$154,100; 2011 – \$68,500).

In December 2009, Reliable issued 9,350,000 flow-through common shares at \$0.43 per share for total proceeds of \$4,020,500. Under the terms of the flow-through agreement, the Company is committed to spend \$4,020,500 on qualified exploration and development expenditures by December 31, 2010. These expenditures were renounced to the flow-through share investors effective December 31, 2009. As at March 31, 2010, a total of \$1,782,122 remained to be incurred on eligible expenditures.

As at March 31, 2010 and 2009, the Company had no commodity contracts outstanding. However, subsequent to quarter-end, Reliable has put two hedges in place, including 75 bbls/d at CDN\$84.15/bbl from April 1, 2010 to March 31, 2011 and 25 bbls/d at CDN\$77.61/bbl from July 1, 2010 to March 31, 2011.

During the three months ended March 31, 2010 and 2009, Reliable was not involved in any off-balance sheet transactions.

Related Party Transactions

Reliable has entered into transactions with the following related parties who provide management consulting services to the Company:

PEM Consulting – controlled by a previous officer of the Company

Max Consulting Ltd. – controlled by a previous officer of the Company

1119402 Alberta Ltd. – controlled by an officer of the Company

Time Exploration Ltd. – controlled by an officer of the Company

Ellis Land Inc. – controlled by an officer of the Company

Alan Blackie – a former consultant of the Company

Three Months Ended March 31,	2010	2009
	(\$)	(\$)
Management consulting fees charged to:		
General and administrative		
General management	–	48,000
Finance	8,575	36,600
Engineering	–	18,000
Exploration	–	30,000
Land	–	33,895
	8,575	166,495
Operating expenses	–	5,400
Property and equipment	–	12,600

These transactions were in the normal course of business and valued at the exchange amount, which is the amount of consideration established and agreed to by the related parties. Effective January 1, 2010, all management consulting agreements were terminated and replaced with executive employment agreements.

Reliable has retained the law firm of Parlee McLaws LLP (“Parlee”) to provide legal services. Mr. James D. Thomson, Corporate Secretary of Reliable, is a partner of Parlee. During the three months ended March 31, 2010, Reliable incurred \$18,016 in costs with Parlee (2009 – \$23,813). Services provided related to advice and counsel primarily in the areas of general legal, corporate governance matters, and banking and equity offerings. These services were billed at rates consistent with those charged to third parties. The Company expects to continue using the firm’s services throughout the remainder of 2010.

Future Accounting Policy Changes

Business Combinations

In December 2008, the Canadian Institute of Chartered Accountants (“CICA”) issued Section 1582 – “Business Combinations”. This section is effective January 1, 2011 and applies prospectively to business combinations for which the acquisition date is during the first annual reporting period beginning on or after January 1, 2011 for the Company. Early adoption is permitted. This section replaces Section 1581 – “Business Combination” and harmonizes the Canadian standards with International Financial Reporting Standards.

International Financial Reporting Standards

In February 2008, the Canadian Accounting Standards Board confirmed that the transition date to International Financial Reporting Standards (“IFRS”) from Canadian GAAP will be January 1, 2011 for publicly accountable enterprises. The Company will be required to report its results in accordance with IFRS starting in 2011, with comparative IFRS information for the 2010 fiscal year. Any adjustments resulting from a change in policy will be applied retroactively, with corresponding adjustments to opening retained earnings. Reliable is currently evaluating the impact of these new standards. The implementation of IFRS may result in a significant impact on the Company’s accounting policies, measurement and disclosure.

Reliable’s IFRS implementation project consists of three phases.

- Initial diagnostic – Identifying areas that may be impacted by the transition to IFRS. The potential impact on the Company’s financial reporting and overall difficulty of the conversion effort for each area was evaluated.
- Impact analysis, evaluation and solution development – Selecting IFRS accounting policies, quantifying the impact on the opening IFRS balance sheet from the adoption of IFRS policies and the development of draft IFRS financial statements.
- Implementation and review – Updating Reliable’s information systems and procedures to prepare IFRS financial statements.

Reliable has completed the initial diagnostic phase and the subsequent phases were underway at period-end.

Based on existing IFRS, the areas that have the potential for the most significant financial impact on the Company’s financial statements are the methodology for asset impairment testing, the absence of a comparable standard to full cost accounting and the accounting for decommissioning obligations. The exemptions to full restatement available under IFRS are also being considered. IFRS requires the Company to conduct an asset impairment test upon implementation. The test for impairment under IFRS requires the use of a discounted cash flow model to determine fair value, whereas Canadian GAAP uses an undiscounted cash flow model to determine impairment and then a discounted cash flow model to quantify the impairment. Market factors such as discount rates and commodity prices will affect the evaluation of impairment. Depending on these factors on the date of adoption, the Company may have an asset impairment loss. However, IFRS permits subsequent recovery of such write-downs in future periods to the extent that fair value increases.

The absence of a full cost standard equivalent in IFRS may lead to certain exploration and development costs currently capitalized under Canadian GAAP being reclassified to opening deficit on the balance sheet. For entities using the full cost method, the International Accounting Standards Board has issued an exemption from full retrospective application of IFRS for the measurement of oil and gas assets at the transition date. In relation to oil and gas assets, IFRS only provides guidance in the exploration and evaluation (“E&E”) phase, up to the point when technical feasibility and commercial viability of extracting the resource can be demonstrated. Accounting for E&E activities under IFRS is congruent with Canadian GAAP, but expenditures beyond this phase must be considered within the IFRS capitalization criteria for property, plant and equipment (“PP&E”) and/or intangible assets. Reliable is currently evaluating if the Company’s development expenditures meet the recognition criteria for PP&E and the potential impact on the measurement of PP&E.

Depletion of oil and gas assets under Canadian GAAP is calculated under the unit-of-production method using remaining proved reserves. Similar guidance does not exist under IFRS. Reliable is evaluating the Company's depletion policy to possibly include proved and probable reserves if this more accurately reflects the usage of resource assets. In addition, IFRS requires that significant parts of an asset are recognized and depreciated separately, whereas this is not specifically required under Canadian GAAP. No material components requiring separate depreciation were initially identified, and therefore, minimal impact is anticipated for this in the Company's financial statements.

Canadian GAAP includes specific guidance with respect to asset retirement obligations, whereas under International Accounting Standards ("IAS"), asset retirement obligations are included under IAS 37 – "Provisions, Contingent Liabilities and Contingent Assets". The threshold for recognition of a provision under IFRS is lower than under Canadian GAAP. In addition, IFRS requires the use of the current market based discount rate to be applied to the liability at each reporting date rather than the historical rate used when the liability was initially set up. The impact of these differences has not yet been evaluated.

IFRS 1 provides the framework for the first time adoption of IFRS and specifies that an entity shall apply the principles under IFRS retrospectively. However, both optional and mandatory exceptions to retrospective application are provided under IFRS. Evaluation of the exemptions is currently underway.

Financial Instruments Disclosures

In May 2009, the CICA amended Section 3862 – "Financial Instruments – Disclosures" to include additional disclosure requirements about fair value measurement for financial instruments and liquidity risk disclosures. These amendments require a three-level hierarchy that reflects the significance of the inputs used in making the fair value measurements. Fair values of assets and liabilities included in Level 1 are determined by reference to quoted prices in active markets for identical assets and liabilities. Assets and liabilities in Level 2 include valuations using inputs other than quoted prices for which all significant outputs are observable, either directly or indirectly. Level 3 valuations are based on inputs that are unobservable and significant to the overall fair value measurement. These amendments were effective for Reliable on December 31, 2009.

Controls and Procedures

Disclosure Controls

Disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company is accumulated and communicated to management, including the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), to allow timely decisions regarding required disclosure. Reliable's CEO and CFO have concluded, based on their evaluation as of the end of the period covered by the Company's interim filings, that the Company's disclosure controls and procedures are effective to provide reasonable assurance that material information related to the issuer is made known to them by others within the Company.

Internal Controls Over Financial Reporting

Management has assessed the effectiveness of the Company's internal controls over financial reporting as defined by National Instrument 52-109 at December 31, 2009. The assessment was based on the framework in "Internal Control – Integrated Framework" issued by the Committee of Sponsoring Organizations. No changes were made to the Company's internal controls over financial reporting during the period ended March 31, 2010 that have materially affected, or are reasonably likely to materially affect, internal controls over financial reporting.

It should be noted that while Reliable's CEO and CFO believe that the Company's internal controls and procedures provide a reasonable level of assurance and that they are effective, they do not expect that these controls will prevent all errors and fraud. A control system, no matter how well conceived or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met.

Risk Factors

The reader should consider each of the following factors as well as the other information contained in this report in evaluating the Company's business and future prospects. Crude oil and natural gas exploration involves a high degree of risk and there is no assurance that expenditures made on future exploration or development activities by the Company will result in new discoveries. The risks and uncertainties described below are not the only ones the Company is faced with. Additional risks and uncertainties not presently known may also impair the Company's business operations. If any of the following risks occur, the Company's business and financial results could be harmed. This could have a negative impact on the valuation of the Company's common stock. The reader should also refer to the other information set forth in this report, including the Company's annual consolidated financial statements and the accompanying notes.

- Limited operating history and no certainty of future profitability.
- Fluctuations in both crude oil and natural gas pricing could have both a positive and a detrimental impact on the Company's operations and valuation.
- Volatile product market demand.
- Transportation interruptions.
- Government regulations and taxes.
- Environmental and safety concerns.
- Ability to raise capital.
- Management of future growth and expansion.
- Ability to continue to secure lands for exploration and development.
- Weather.

The Company mitigates these risks by diligent management of those factors that it can control, including the engagement of highly qualified and experienced professionals, use of the latest technology and a focus on low cost reserves.

Reliable carries insurance coverage to protect itself against potential losses due to accidental destruction of assets, well blowouts and environmental damages. The Company also follows all government regulations and has an emergency response plan in place.

Supplemental Quarterly Information

Total (boe/d)	307	204	80	82
Total (boe)	27,621	18,750	7,547	7,779

Note: The selected quarterly information has been prepared in accordance with the accounting principles as contained in the notes to the consolidated financial statements for the year ended December 31, 2009.

Outlook

The Company's strategy for the current year is focused on a balance of true exploration drilling (to discover new reserves) and development drilling (to increase production and cash flow), an approach aimed at maximizing shareholder value. In addition, Reliable remains committed to increasing its presence at Kirkella by continuing to acquire lands on prospects that have been identified, through geology and geophysics, as having potential for light sweet oil in the Bakken, Lodgepole and Three Forks formations. To enhance success in its drilling program, the Company believes that seismic data is essential for identifying new prospects and delineating discovered pools, and as a result, it has allocated approximately \$1.2 million of its annual budget towards shooting and acquiring additional 2-D and 3-D seismic data. The Kirkella project area is currently comprised of 66,000 net acres of undeveloped land at 74% working interest with an exploration drilling inventory exceeding 16 wells.

On May 27, 2010, Reliable announced it had closed a bought deal financing with a syndicate of underwriters for gross proceeds of approximately \$15.0 million, which was heavily oversubscribed. The financing, combined with available credit facilities and this year's annual projected cash flow of \$8.1 million to \$9.1 million, will enable the Company to expand its capital expenditure program for 2010, including potential horizontal drilling tests and a pilot water flood, aimed at further enhancing production and reserves in its core area.

Additional Information

Additional information relating to Reliable Energy Ltd. can be accessed on the Company's website at www.reliableenergy.ca or under the Company's public filings found at www.sedar.com.

Notes to the Financial Statements

Three Months Ended March 31, 2010
(unaudited)

1. Nature of Business

Reliable Energy Ltd. (“Reliable” or the “Company”) was incorporated under the laws of the province of Alberta on November 15, 2004. On October 22, 2009, Reliable acquired 100% of the outstanding shares of Element Energy Canada Ltd. (“Element”). On February 1, 2010, Reliable and Element amalgamated under the name of Reliable Energy Ltd. The Company’s principal activity is the exploration for and development of crude oil and natural gas properties in Western Canada.

The common shares of the Company are listed for trading on the TSX Venture Exchange under the symbol REL.

2. Basis of Presentation and Significant Accounting Policies

The accompanying financial statements are stated in Canadian dollars, have been prepared in accordance with Canadian generally accepted accounting principles (“GAAP”) on a basis consistent with those used in the preparation of the most recent annual financial statements. These unaudited financial statements do not include all disclosures required by GAAP for annual financial statements, and therefore, should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2009.

Recent Accounting Pronouncements

International Financial Reporting Standards

In February 2008, the Canadian Accounting Standards Board confirmed that the transition date to International Financial Reporting Standards (“IFRS”) from Canadian GAAP will be January 1, 2011 for publicly accountable enterprises. The Company will be required to report its results in accordance with IFRS starting in 2011, with comparative IFRS information for the 2010 fiscal year.

The Company is progressing with its preparation for the changeover to IFRS. The Company has completed its assessment of IFRS accounting policies and is reviewing its elections with its auditor. The implementation phase, which includes updating its data systems, internal controls over financial reporting and business activities such as financing and compensation arrangements, is planned for the first half of 2010.

Business Combinations

The Canadian Institute of Chartered Accountants’ Handbook Section 1582 – “Business Combinations” replaces corresponding Section 1581 and establishes new standards for the accounting for business combinations. The new standard requires that the acquisition method (formerly, the purchase method) continue to be applied to business combinations, the acquirer recognize and measure the acquiree as a whole, and the assets and liabilities assumed be recognized and measured at their fair values as of the acquisition date. Section 1582 provides the Canadian equivalent to IFRS 3 business combinations.

This standard applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2011. The Company has not yet determined the impact of the adoption of this new standard on its financial statements.

3. Capital Management

The Company's capital structure is comprised of shareholders' equity, convertible debentures and working capital. The Company's objectives when managing its capital structure are to maintain financial flexibility so as to preserve access to capital markets and its ability to meet its financial obligations, and to finance internally generated growth and potential strategic acquisitions. To manage its capital structure the Company may adjust spending, issue new shares, issue new debt or repay existing debt.

The Company prepares an annual budget, which is updated periodically for any significant acquisitions, changes in economic circumstances and successes or failures of its capital program.

As at March 31, 2010, the Company had a working capital deficit of \$1,923,213 (December 2009 – surplus of \$1,994,017), which, when combined with its ongoing cash flows from operations, funds available under the bank facility and expected proceeds from the recently announced financing (see note 16 – Subsequent Events), will be sufficient to fund operations and the Company's capital expenditures program for the next 12 months.

4. Property and Equipment

	Cost	Accumulated Depletion and Depreciation	Net Book Value
	(\$)	(\$)	(\$)
March 31, 2010			
Petroleum and natural gas properties	24,360,726	2,666,410	21,694,316
Leasehold and office equipment	368,072	308,218	59,854
	24,728,798	2,974,628	21,754,170
December 31, 2009			
Petroleum and natural gas properties	19,203,670	1,871,880	17,331,790
Leasehold and office equipment	359,894	299,816	60,078
	19,563,564	2,171,696	17,391,868

As at March 31, 2010, the Company excluded \$13,177,426 (December 2009 – \$9,664,509) of resource properties relating to unproved properties from the depletion calculation. Unproved properties have been separately evaluated by management for impairment.

During the three months ended March 31, 2010, the Company capitalized \$131,000 (2009 – \$21,000) related to the asset retirement obligations of property and equipment. The Company did not capitalize any general and administrative costs during 2010 or 2009 other than to the extent of the Company's working interest in operated capital expenditure programs on which operator's fees have been charged in accordance with standard industry agreements.

As at March 31, 2010, no impairment write-down was required. The impairment test was calculated using the following benchmark reference prices:

	Crude Oil	Natural Gas
	(\$CDN/bbl)	(\$CDN/mcf)
2010	79.05	5.85
2011	81.70	6.55
2012	84.45	6.95
2013	88.11	7.25
2014	91.96	7.60
After 2014 (inflation %)	2%/year	2%/year

5. Future Income Taxes

The components of the net future income liability are as follows:

As at	March 31, 2010	December 31, 2009
	(\$)	(\$)
Future Income Tax Assets (Liabilities)		
Property and equipment	(3,277,658)	(2,472,044)
Share issue, reverse takeover and financing costs	317,777	372,890
Asset retirement obligations	239,360	213,108
Non-capital losses	2,001,659	2,399,372
Other	6,727	4,865
Valuation allowance	–	(518,191)
Net future income tax liability	(712,135)	–

Due to the uncertainty surrounding realization of the tax assets, they have been recognized only to the extent necessary to offset future tax liabilities.

The income tax expense differs from the amount that would be expected by applying the current tax rates for the following reasons:

Three Months Ended March 31,	2010	2009
	(\$)	(\$)
Income (loss) before income taxes	110,683	(488,847)
Tax rate	30.0%	31.30%
Expected tax recovery	33,205	(153,009)
Increase (decrease) in provision resulting from:		
Effect of change in tax rate	13,190	32,787
Share issue costs	–	(9,949)
Change in valuation allowance	(518,191)	(2,441,326)
Other	74,273	10,747
Future tax recovery	(397,523)	(2,560,750)

The Company has the following estimated tax pools available for deduction against future taxable income:

As at	March 31, 2010	December 31, 2009
	(\$)	(\$)
Canadian exploration expense	1,012,634	1,946,124
Canadian development expense	900,691	334,151
Canadian oil and gas property expense	5,451,743	4,663,374
Undepreciated capital cost	2,513,529	1,921,211
Share issue and deferred financing costs	775,361	1,288,035
Non-capital losses	7,628,395	8,050,533
Other	46,856	46,856
Total estimated tax pools	18,329,209	18,250,284

6. Bank Loans

The Company has the following credit facilities in place at March 31, 2010:

- A revolving demand loan facility for up to \$5,000,000 with outstanding balances bearing interest at Canadian prime plus 1.5%;
- An acquisition/development demand loan facility for up to \$2,000,000 bearing interest at Canadian prime plus 2%; and
- A risk management facility of up to \$100,000 utilizing various financial instruments subject to bank availability.

The Company has not made any draws on these facilities as of March 31, 2010.

7. Convertible Debentures

In August 2006, Reliable issued \$1,200,000 of Convertible Unsecured Subordinated Debentures (the "Debentures") maturing July 31, 2011. The Debentures bear interest at 7.5% and are convertible to common shares of the Company at the option of the holder at a conversion price of \$1.40 per common share. The Debentures are redeemable by the Company in whole or in part at the rates indicated below.

July 31, 2010	105.0% of face value
Subsequent to July 31, 2010	102.5% of face value

The terms of the Debentures required Reliable to complete a defined 'Liquidity Event' prior to February 15, 2008. The Liquidity Event was not completed, and in 2008, Reliable issued a one-time additional \$60,000 of Debentures for no additional consideration.

As the Debentures are considered to be compound financial instruments, the principal amount has been allocated between liability and equity components, which are then classified separately on the balance sheet. The liability component has been determined using an interest rate for comparable debt instruments having no conversion rights. The difference between the liability component and the principal amount of the Debentures has been allocated to shareholders' equity.

The following table shows the debenture activities:

Convertible Debentures	Number of Debentures (#)	Debt Component (\$)	Equity Component (\$)
Balance – December 31, 2008	1,260	1,167,481	88,780
Accretion	–	32,803	–
Balance – December 31, 2009	1,260	1,200,284	88,780
Accretion	–	8,766	–
Balance – March 31, 2010	1,260	1,209,050	88,780

8. Asset Retirement Obligations

As at	March 31, 2010	December 31, 2009
	(\$)	(\$)
Balance – beginning of period	727,330	254,243
Liabilities incurred	129,000	450,000
Liabilities settled	–	(8,697)
Change in estimated cash flows	2,000	11,000
Accretion	8,917	20,784
Balance – end of period	867,247	727,330

The future estimated undiscounted cash flows required to settle the obligation are \$1,706,481 (2009 – \$1,313,530), which has been discounted using a credit-adjusted risk free rate of 5.5% (2009 – 3.75%) and inflated at a rate of 3.9% (2009 – 3.9%) per year. Most of these obligations are not expected to be paid for 10 to 20 years in the future and will be funded from general Company resources at that time.

9. Share Capital

(a) Authorized

Unlimited voting common shares without nominal or par value.

(b) Issued

Common Shares	Number ⁽ⁱ⁾	Value
	(#)	(\$)
Balance – December 31, 2008	126,855,872	18,516,427
Effect of future income taxes on renounced resource expenditures ⁽ⁱ⁾	–	(2,560,750)
Private placement ⁽ⁱⁱ⁾	34,667,334	5,200,100
Acquisition of Element ⁽ⁱⁱⁱ⁾	11,025,000	1,656,253
Options exercised	122,850	20,885
Brokered private placement ^(iv)	9,350,000	4,020,500
Share issue and transaction costs	–	(453,587)
Balance – December 31, 2009	182,021,056	26,399,828
Effect of future income taxes on renounced resource expenditures ^(v)	–	(1,109,658)
Options exercised	945,000	207,594
Share issue and transaction costs	–	(1,894)
Balance – March 31, 2010	182,966,056	25,495,870

(i) During 2009, the Company renounced \$8,739,760 of resource expenditures required under the flow-through shares issued in 2008. The future income tax effect reduces the book value of the shares issued.

(ii) On October 2, 2009, the Company issued 34,667,334 common shares at \$0.15 per share.

(iii) On October 22, 2009, the Company issued 11,025,000 common shares at a deemed value of \$0.15 per share to acquire Element.

(iv) The Company issued 9,350,000 flow-through common shares at \$0.43 per share on December 22, 2009.

(v) During 2010, the Company renounced \$4,020,500 of resource expenditures required under the flow-through shares issued in 2009. The future income tax effect reduces the book value of the shares issued.

(c) Escrowed Shares

As at March 31, 2010, total shares held in escrow were 10,242,339 (December 2009 – 12,802,916) pursuant to the requirements of the TSX Venture Exchange. Subsequent to the issuance of the final Exchange bulletin on January 29, 2009, 15% of the escrowed securities are being released at the completion of each six-month period.

(d) Stock Options

The Company has a stock option plan under which the Board of Directors may grant options to directors, officers, other employees and key consultants. Under the plan, the aggregate number of shares that may be reserved for issuance pursuant to stock options, excluding brokers options, may not exceed 10% of the issued shares of the Company at the time of granting. Options have a maximum term of five years and terminate 90 days following the termination of the optionee's employment or service to the Company. All options currently issued vested 100% at the time of granting.

The Company has also issued stock options to several brokerage firms regarding financing activities of the Company. These options have various terms up to a maximum of two years and vested 100% at the time of granting.

0.190	5,605,000	4.45	5,605,000
0.200	220,000	1.64	220,000
0.161	10,736,350	3.61	10,736,350

Stock-Based Compensation

No stock-based compensation was recorded in the quarters ended March 31, 2010 and 2009 as there were no stock options granted during the periods and all previously granted options had fully vested.

(e) Common Share Purchase Warrants

As at March 31, 2010, the Company had 5,641,590 (2009 – 505,716) common share purchase warrants outstanding. Of this amount, 2,435,196 warrants entitle the holder to acquire 2,435,196 common shares of the Company at an exercise price of \$0.120 per share expiring June 11, 2010, 2,700,678 warrants entitle the holder to acquire 2,700,675 common shares of the Company at an exercise price of \$0.120 per share expiring June 23, 2010 and 505,716 warrants entitle the holder to acquire 505,716 common shares of the Company at an exercise price of \$nil expiring December 31, 2013.

10. Contributed Surplus

As at	March 31, 2010	December 31, 2009
	(\$)	(\$)
Balance – beginning of period	1,340,173	459,273
Stock-based compensation:		
Options issued to directors and management	–	880,900
Transfer to share capital on exercise of stock options	(19,994)	–
Balance – end of period	1,320,179	1,340,173

11. Per Share Amounts

Three Months Ended March 31,	2010	2009
	(#)	(#)
Weighted average shares outstanding		
Basic	182,801,889	126,855,872
Diluted	192,507,033	139,798,804

The effect of convertible debentures has not been included in the calculation of diluted earnings per share for 2010 and 2009 as the effect is anti-dilutive.

12. Supplemental Cash Flow Information

Three Months Ended March 31,	2010	2009
	(\$)	(\$)
Accounts receivable	(465,369)	133,847
Prepaid expenses and deposits	159,407	(52,495)
Inventory	(16,018)	–
Demand notes receivable	–	(617)
Accounts payable and accruals	(1,315,897)	168,069
	(1,637,877)	248,804

The change in non-cash working capital has been allocated to the following activities:

Three Months Ended March 31,	2010	2009
	(\$)	(\$)
Operating	(2,068,715)	(93,338)
Financing	–	–
Investing	430,838	342,142
	(1,637,877)	248,804

13. Commitments

The Company is committed to payments under an operating lease for office space through April 2011 totaling \$222,600 (2010 – \$154,100; 2011 – \$68,500).

Under the flow-through share agreements the Company entered into in 2009, the Company is committed to spend \$4,025,000 on qualified exploration and development expenditures by December 31, 2010. These expenditures were renounced to the flow-through share investors effective December 31, 2009. As at March 31, 2010, \$1,782,122 remains to be incurred on eligible expenditures.

14. Related Party Transactions

- (a) During the three months ended March 31, 2010, the Company had the following transactions with companies controlled by certain of the Company's directors and officers:

Three Months Ended March 31,	2010	2009
	(\$)	(\$)
Management consulting fees charged to:		
Administration expense	8,575	166,495
Operating expense	–	5,400
Property and equipment	–	12,600

As at March 31, 2010, accounts payable and accruals included a balance of \$3,528 (December 2009 – \$2,032) relating to the above transactions.

These transactions were in the normal course of business and valued at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

Reliable has retained the law firm of Parlee McLaws LLP (“Parlee”) to provide legal services. The Corporate Secretary of Reliable is a partner of Parlee. During the three months ended March 31, 2010, Reliable incurred \$18,016 in costs with Parlee (2009 – \$23,813). Services provided related to advice and counsel primarily in the areas of general legal, corporate governance matters, and banking and equity offerings. These services were billed at rates consistent with those charged to third parties. As at March 31, 2010, accounts payable and accruals included a balance of \$47,786 (December 2009 – \$60,133) relating to the above transactions.

- (b) During 2006, the Company accepted a promissory note from a related party shareholder in the amount of \$75,000 regarding the purchase of shares. The note bears interest at 6% and is repayable in annual installments of \$25,000 beginning on July 1, 2007. However, the 2008 and the 2009 annual payments were not made as acknowledged by the Board of Directors. The balance of this note as at March 31, 2010 was \$50,000 (2009 – \$50,000). The note is secured by the borrower's shares in the Company.
- (c) The Company has paid certain costs on behalf of related parties. As at March 31, 2010, accounts receivable include a balance of \$10,106 (2009 – \$10,106) relating to these transactions.

15. Financial Instruments

The Company's financial instruments consist of cash and cash equivalents, accounts receivable, accounts payable and accruals, commodity contracts and convertible debentures. The main financial risks affecting the Company are discussed below.

Fair Value

The carrying amount of cash and cash equivalents, accounts receivable and accounts payable and accruals approximates their fair value due to the short-term maturities of these items. The fair value of the convertible debentures as at March 31, 2010 was estimated by discounting future cash flows at a rate that approximated the interest rate that would have been applicable to non-convertible debt. The fair value approximated the carrying value at that time.

Credit Concentration

Credit risk is the risk of a financial loss occurring as a result of a default of a counterparty on its obligation to the Company. The Company's financial instruments that are exposed to credit risk consist primarily of accounts receivable with customers in the oil and gas industry and are subject to normal industry credit risks. The Company continuously monitors and evaluates credit risk to third parties.

The Company does not consider any receivables to be past due.

15. Financial Instruments (continued)

Commodity Price Risk

The Company is exposed to fluctuations in commodity prices for natural gas. Commodity prices are affected by many factors, including supply and demand. The Company monitors these risks, and when appropriate, utilizes financial instruments to manage its exposure to these risks.

As at March 31, 2010, the Company had no outstanding derivative contracts.

Interest Rate Risk

Interest rate risk is the risk that the value of a financial instrument might be adversely affected by a change in the interest rates. In seeking to minimize the risks from interest rate fluctuations, the Company manages exposure through its normal operating and financing activities. The Company is exposed to interest rate risk primarily through its short-term deposits.

Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with the financial liabilities. The Company's operating cash requirements, including amounts projected to complete the Company's existing capital expenditures program, are continuously monitored and adjusted as input variables change. These variables include, but are not limited to, available credit, production from existing wells, results from new wells drilled, commodity prices, cost overruns on capital projects and regulations relating to prices, taxes, royalties, land tenure, allowable production and availability of markets. As these variables change, liquidity risks may necessitate the Company to conduct equity issues or obtain project debt financing. The Company also mitigates liquidity risk by maintaining an insurance program to minimize exposure to insurable losses.

16. Subsequent Events

On May 19, 2010, 5,135,874 broker's warrants were exercised resulting in cash proceeds of \$616,305.

On May 27, 2010, Reliable closed a bought deal financing agreement with a syndicate of underwriters and issued 30,000,000 special warrants at a price of \$0.30 per special warrant and 16,500,000 common shares issued on a flow-through basis at a price of \$0.365 per flow-through share for aggregate gross proceeds of approximately \$15,000,000.

17. Comparative Figures

Certain comparative figures have been reclassified to conform to presentation adopted for the current year.
